

CTPAT Security Intensive Training

Live Online | 9:00am – 5:00pm EST | \$1,295 per person

CTPAT compliance isn't defined by what has been accepted so far — it's defined by what you can demonstrate when it matters.

Validation occurs every four years. But scrutiny can happen at any time. When that moment comes, written procedures are not enough. You must be able to demonstrate that required controls are implemented, documented, and consistently followed — and preparing doesn't mean scrambling the month before your notice arrives. CBP expects to see a program that has been consistently maintained, not one that was rushed into shape.

WHAT YOU GAIN

Participants leave with usable expertise, not just theory:

- › How to navigate the CTPAT Portal
- › Translate MSC into real operational controls
- › Identify gaps and document corrective actions
- › Understand what CBP looks for during validations
- › Avoid common validation findings
- › Confidence to answer CBP questions during a Validation
- › A Certificate of Completion

WHAT YOUR COMPANY GAINS

Organizations see immediate operational benefits:

- › Improved readiness for validations and CBP reviews
- › Reduced risk of validation findings
- › Greater consistency between procedures and practices
- › A more defensible, sustainable security program
- › Reduced compliance-related risk exposure
- › Protected CTPAT certification status

WHAT THE TRAINING COVERS

Everything. From the ground up.

- › **All 11 MSC categories** — What CBP requires in each one and how to demonstrate it
- › **How CBP Validations actually work** — What happens, what gets flagged, what doesn't
- › **Risk Assessment** — How to build one that holds up to scrutiny — not just checks a box
- › **CTPAT Portal** — How to manage it, update the Security Profile, and respond to findings
- › **Your SCSS** — What to expect and how to stay prepared no matter who CBP assigns

Thinking about handing CTPAT off to someone?

Send them here first. This training gives a new person everything they need to take ownership with confidence — not six months of learning on the job while your certification is on the line.

SECURE TRADE — ADVISORS —

WHY SECURE TRADE ADVISORS

Secure Trade Advisors specializes exclusively in the CTPAT Security program.

› **Our subject matter experts are proven professionals.**

We work only with experienced practitioners who bring a strong track record of training effectiveness, industry expertise, and professionalism — and who deliver clear, real-world guidance you can use immediately.

› **We focus on what matters most.**

This program is built to deliver the most essential and practical information — the material that makes the biggest difference in building and maintaining a strong CTPAT Supply Chain Security program.

› **This training is designed to be applied — not just understood.**

You won't leave with generic theory. You'll walk away with tools, guidance, and takeaways you can implement immediately, along with a Certificate of Completion and reference materials to support long-term program success.

› **What differentiates us is strict specialization.**

Unlike firms offering a broad spectrum of trade-related services, we are laser-focused on CTPAT security compliance. This dedicated approach allows us to provide in-depth expertise and up-to-date knowledge, making us industry leaders in this area.

WHO SHOULD ATTEND

- › CTPAT Points of Contact (POCs)
- › Security, logistics, and operations managers
- › Compliance and internal audit personnel
- › Team members responsible for maintaining or supporting CTPAT
- › Professionals new to CTPAT or about to take on program responsibility

FREQUENTLY ASKED QUESTIONS

What does the training include?

Live online participation, practical guidance based on real-world validation experience, a Certificate of Completion, and reference materials to support implementation and long-term program success.

How long is the training and what's the format?

This is a live, instructor-led one-day training delivered online via Zoom. Participants have opportunities to ask questions and walk through real-world examples throughout the day.

What are the technical requirements?

A computer or laptop with a stable internet connection, Zoom access (microphone recommended), and a quiet environment suitable for interactive training. Desktop or laptop recommended over mobile.

Do I receive a certificate?

Yes. Participants receive a Certificate of Completion after successfully completing the training. This certificate may be used internally to document training participation and support competency development.

What is the cancellation policy?

If you need to cancel, please notify us within 48 hours of the session start. We may offer the option to transfer your registration to a future date or substitute another attendee from your organization.

Will this help with validation preparation?

Yes. This training helps participants understand what CBP evaluates, how to prepare supporting evidence, and how to reduce the chance of findings, corrective actions, and follow-up requests.

PAST ATTENDEES

"This training helped me clearly understand what the Minimum Security Criteria truly require and how to demonstrate compliance with confidence, regardless of who our CBP Supply Chain Security Specialist is."

"Our company relied on approved third-party audits for our foreign suppliers, and we felt confident going into a validation last year. Despite favorable audit results, we learned during validation that required CTPAT procedures and practices were missing, putting our certification at risk. This training clarified the difference between third-party audits and what CBP actually expects. I now know exactly what our suppliers must have in place."

NOT ABLE TO ATTEND THE TRAINING?

If your Validation is already scheduled or your timeline doesn't allow for a full training day, we work directly with CTPAT members and their business partners to prepare for upcoming domestic and foreign Validations. Contact us to discuss your situation.
